🌐 sohaib-bin-waheed

PROFESSIONAL SUMMARY

Fresh BS Computer Science graduate with hands-on experience in React Native mobile development, REST API, C#, C++, Java, SQL, and database-backed applications. Published FYP research on a Computer Architecture Toolkit and gained educational internship exposure through self-learning and project practice. Interested in mobile apps, backend APIs, and clean software solutions.

WORK EXPERIENCE

Educational Intern, Morosoft Technologies	02/2026 – 05/2026
- Educational self-learning internship focused on improving software development skills. - Practiced project-based learning, debugging, documentation, and application development concepts.	Saidpur Road, Rawalpindi
Call Centre Agent	05/2023 – 10/2023
Handled customer inquiries, provided solutions, and improved communication and problem-solving skills.	Rawalpindi, Pakistan
Tutor	05/2022 – 08/2022
Provided academic support in mathematics, science, and computer science through one-on-one tutoring.	Rawalpindi, Pakistan

EDUCATION

BS Computer Science, BIIT, PMAS Arid Agriculture University	2022 – 2026
Field of study: Software and applications development and analysis; FYP: Computer Architecture Toolkit Mobile Application.	Rawalpindi, Pakistan

TECHNICAL SKILLS

Mobile React Native	Languages - JavaScript - C# - C++ - Java
Backend & APIs ASP.NET MVC / Web API basics	Database SQL
Tools - Microsoft Office - Word - Excel - documentation	Strengths - Problem-solving - communication - teamwork - self-learning mindset

PROJECTS

Computer Architecture Toolkit Mobile Application (FYP), *React Native, API, Database, Computer Architecture*

- Built a cross-platform educational toolkit for designing and exploring custom CPU architectures.
- Implemented authentication, instruction execution, registers, memory, stack, flags, and visualization modules.
- Structured the UI and logic for scalable future enhancements.

Cinema Ticket Booking System, *Data Structures / Backend Logic*

- Implemented backend logic for seat reservation, movie scheduling, admin panel, and seat availability indicators.

Airline Management System, *Java, Database*

- Designed a Windows-based airline management system with database support for operational records.

PUBLICATION / ACHIEVEMENT

Annual Methodological Archive Research Review, 4(4), 438-448

01/04/2026

- **Research Paper Published:** *An Interactive Toolkit for Designing and Exploring Custom CPU Architectures* - Annual Methodological Archive Research Review, 4(4), 438-448, May 2026. View Paper [↗](#)
